

RECYCLING - SUSTAINABLE DEVELOPMENT - ECO CONCEPTION

**AFNOR Éditions publishes THE practical guide in 100 Questions
to understand everything about the circular economy**

Extract-produce-consume-discard, the model is at an impasse. The current health, ecological and societal crises are the expression of an essential transition towards a more responsible economy. A change is necessary: make way for the circular economy! In 100 Questions, this completely revised edition explains the concept of circular economy and presents all the tools available to allow organizations, citizens and public actors to understand its contours and seize all the opportunities.

Recognized specialists on the subject, the authors organize their remarks into nine key chapters:

1. Circular economy: what are we talking about?
2. Standardization issues for the circular economy
3. Sustainable sourcing
4. Ecodesign
5. Industrial and territorial ecology
6. The functionality economy
7. Responsible consumption: purchasing, collaborative consumption, use
8. Extension of the duration of use: reuse, repair and reuse
9. Recycling, waste management

Treated in a synthetic way, the 100 questions and answers get to the point. They allow anyone interested or concerned by the circular economy to have a global vision and

to have all the practical information essential to put it in place.

The authors also put the place of eco-design and environmental management into perspective and offer a comprehensive update on the evolution of sector standards, essential to supporting stakeholders in their transition.

This new edition demonstrates the dynamics of the circular economy in recent years and the progress of its deployment, both in the practices of economic actors and in regulations.

An essential guide which constitutes a real “how to” for the circular economy.

Authors

Holder of a doctorate in geochemistry, **Hervé Ross-Carré** taught at the Faculty of Sciences in Oujda, Morocco, before becoming a commercial engineer in scientific instrumentation, then regional delegate and development manager for the AFNOR group. He is co-founder of Écopôle, an environment center in Nantes.

Holder of a master's degree in economics and international affairs from INSEEC, and after a commercial and business consulting career, **Anne Benady** has been responsible for Environment & Circular Economy for the AFNOR group since 2018. In this capacity, she coordinates the development of tools and solutions to support organizations of all kinds in their ecological transition.
